

Suggested Questions for an Interview with Jim Sparks

For the past 18 years you report having had experiences with ETs or other worldly beings. Your new book, *The Keepers: An Alien Message for the Human Race*, which has a foreword by the late Dr. John Mack, explores your experiences with the aliens.

1. How did your experiences begin?
2. How did your work with Dr. Mack assist you in dealing with the visitors?
3. What were your early abductions like?
4. Like most experiencers, you initially resisted being abducted, and were quite angry. What changed your experience from resister to cooperator?
5. Unlike most other experiencers, you report that you have about 90% (percent) recall of your experiences with the aliens and that you are aware of what is happening when it's going on. What is that like, and do you feel yourself coming back into our reality?
6. How did your experience change over the years, and do you still consider your current experiences with these other worldly-beings abductions?
7. How did you get over being scared? What techniques did you use to help you handle the fear so you could learn to work with them?
8. In *The Keepers*, you explain that you were trained by the Greys and have had dealings with the so-called Reptilians. What group did the majority of your early abductions and what are the primary differences you see in the two groups?
9. They taught you an alphabet so you could communicate with them. Do you still use that form of expression now to work with them? If not, how do you communicate with them now?
10. Why do you think they taught you an alphabet when they can communicate telepathically to anyone in the world?
11. Where do you think these beings are from?
12. Given your years of experience, why do you think they are here contacting regular citizens, like yourself, instead of working with government officials?
13. It's been reported that our government had agreements with ETs. What can you tell us what you know about that?
14. Speaking of the government, it's been reported that they contacted you. What did they want to know about?

15. How often do the ETs contact you now and what group or groups do you work with?
16. What type of technologies do they use and what kind do you know of that they have shared with humans?
17. How do they travel? How do you think they get abductees into their dimensions?
18. You explain that the ETs are not always fully in our dimension, and that they can be in other dimensions not seen nor detected. Where are they, if not here? How do you think they can be in multiple dimensions at once?
19. *The Keepers* reports that you were shown pictures of our planet being destroyed. Do you believe they are here to help us? Is there a campaign to save the planet?
20. What is the main message they have given you to share?
21. Why do you think they want to help us?
22. Who are the beings that are encouraging you to pass along the message of saving our environment?
23. Are they like us? Do they feel emotionally as we do, or are they robotic in their expressions and feeling-less, as many report?
24. You've said that your experiences are primarily with the Greys, who are the workers, and that you've also had limited, yet positive dealings with the Reptilians, and even with some humans who are in military officer's uniforms. Obviously you encounter different beings at different times. How do you think they work together, if they do?
25. In talking about alien beings, we typically define them by the form, not the consciousness. What kind of consciousness do the Reptilians have that you work with? What about other species?
26. Should we trust the ETs? If so, why?
27. Do you know why they chose to work with you?
28. What is your work now with the aliens?
